

Hydromar HD Cylinder

Hydromar HD Cylinder

- The HYDROMAR HD CYLINDER is a hydraulic cylinder. The cylinder is 200 mm in height adjustable. The minimum height of the cylinder is 365 mm
- A complete pedestal consist of two parts, the cylinder and a stainless steel fixed part, which is available in the height 50, 100, 150, 200, 250, 300 mm
- The lever is used to pump up and lower down the pedestal as well to engage the brake for the rotation
- The fixed stainless steel part is so constructed that fitting the pedestal on the Multi-Rail is very easy
- Also available in complete stainless steel version
