

Air suspension

Air suspension

This airsuspension unit can be used under every Recaro Maritime model.

Developed specially for marine use with additional stiffeners.

The suspension is regulated by an internal compressor which can be set to suit all weights.

The voltage for the compressor is 24 Volt DC.

Recaro Northsea with (specially modified) suspension unit fulfills the requirements of the International Code of Safety for High Speed Craft (HSC Code) and is certified by Bureau Veritas.
